### Model # Max Park 8 Residential Parking Lift

How has **Parkmatic** become America's #1 Hobbyist lift manufacturer? There are many reasons that are all centered on a single vision. Manufacture a quality product, do it consistently, and do it for the lowest possible price.

The Top contributing factors that have made us #1 are:

1. **Manufacturing** - Manufacturing a quality product and doing it consistently are 2 of our proudest accomplishments. **Parkmatic's** manufacturing is one of only two Lift manufacturers with **ISO 9001** compliance. Our lifts are also **ALI/ETL CERTIFIED**. This internationally recognized quality management system has helped us achieve our goals in producing consistent quality not only in the U.S.A., but also in the worldwide market.
2. **Engineering Certification** - Our products have been engineered and tested to meet or exceed industry standards. **Parkmatic** has also taken the extra step of contracting with a third party engineering firm to validate our products safety and capacity ratings. We believe every manufacturer should seek third party testing from an accredited Professional Engineer to validate their marketing claims. In other words, don't take our word for it, we have the proof.
3. **Distribution** - By carefully selecting only the most respected proven distributors, **Parkmatic** has assured it's customers of the highest level of support before, during and after the sale. Our distributors are strategically located to maximize our ability to deliver our products with the least amount of cost to the consumer. **Parkmatic** distributors are simply the most experienced in the industry and are committed to distributing only the highest quality products.
4. **Customer Testimonials** - The greatest credit to any company is to receive the positive testament of a satisfied customer. We are fortunate to now have thousands of satisfied customers and have provided a few of their testaments.
5. **Commitment** - Being # 1 is a claim that can only be made by one and we are proud of this achievement. Staying #1 is a challenge we take very seriously and is the goal that has raised our level of commitment to maintain this position. As you know, only a satisfied customer will return again or refer another.

**Max Park 8 Four Post Parking Lift Specifications**

Capacity	8,000 LB
Lifting Height	86" (7' 2")
